Making calls

Dialling

Insert required phone number on the mobile keypad and press the green button **(5)**. Mobile will start to dial required number.

If you have dialled by mistake a wrong number, just press the right button „Delete" (1) and the last digit will be deleted.
If you need to delete the whole number, press the red button **(4)** and a whole number is deleted.

- Press green button (5) to aswer the call
- Press red button (4) to reject the call
- White talking - adjust the volume by the volume button (14)
- While talking - press right button On/Off (1) to activate the Handsfree function

Photo contacts

The phone can store up to 10 so-called photo contacts - that is, contacts to which a photo or picture is assigned. You can then quickly and easily dial them by selecting an image. The picture is also displayed when you receive a call. Press the Down button (3) on the main screen to display the photo contacts.

SOS call and SMS

Starting the emergency call and SMS

Press and hold the SOS button on the back of your phone. An audible alarm sounds. Now you have 5 sec. to interrupt SOS calls, then the phone will automatically dial the preset numbers from the list automatically until they can call one. The phone repeats calls to all numbers for a maximum of 3x.
The phone also sends an emergency SMS message to the preset numbers with the preset text (to select text in the menu**)**

Setting → SOS Set.. → SOS SMS →SMS text). After that the phone will remain in the emergency mode. In this emergency mode the phone will automatically answer incoming calls and automatically activate the handsfree feature - loud listening. The display will show the inscription SOS.

Turn the phone off and on again to deactivate the SOS function.
SOS function is only available if it is enabled in the settings of the phone and if the numbers are set up at the phone that the mobile should automatically call and send SMS message to.

For set up select in menu : **Settings → SOS Set.**

Deactivation of sending SMS message
It is possible to deactivate the sending of SMS messages after the activation of the SOS button. Select in menu :

1. **Settings → SOS Set. → SOS SMS → Send SMS**
2. Select On / Off

SOS Locator – mobile mobile localisation

Your phone has a special function that allows you, after pressing the SOS button, to determine the location of the phone and and send it via SMS to recipients in the form of a link to view the map - if the recipient is using a regular phone with a web browser.
Just "click" on this link and a map showing the position of the phone displays.

The location is determined based on the focus of the network operator, the accuracy is dependent on the density of the network at a given position, eg. in the cities the position can be determined with an accuracy of tens to a few hundred meters, outside the buildings/cities but a focus accuracy usually decreases.

Setting of function SOS Locator

For the proper service, you need to turn it on in the settings. An SMS with position is then sent each time the SOS button is activated instead of the standard emergency SMS message.

1. Select in menu: **Settings → SOS Set. → SOS regime →SOS Locator**

Remote location request

Position of your mobile phone can be remotely detected by using of a special control SMS.

It is sufficient to send just a command via SMS with a text **OSLOCATOR**. Your ALIGATOR

phone then responds by sending of the current position via SMS.

Important: Your phone sends location and responds only to SMS messages on numbers that are stored for emergency calls.

SMS messages

Your phone can receive and send SMS text messages. The new message you receive will be notified by a symbol 🖂 on the phone screen. A notification will appear on the screen if you have a new unread message. To view the message directly, just press the left button **(2)** and the message is displayed. Press the right button **(1)** if you wish to read the message later on. You can read the message later :
Messages → Received

An unread message is marked with an icon of a closed envelope, the read message is marked with an open envelope symbol.

FM Radio

Your mobile phone is equipped with FM Radio . Select in menu : **Multimedia → FM Radio .** H Press the volume buttons **(14)** to adjust the volume.You can change the frequency using the M1 / M2 **(16)** keys. Press the shutter button **(15)** repeatedly to turn the sound on / off. Press the Left button Options **(2)** to display the FM radio menu (channel list, manual and auto tuning, station storage).

Bluetooth connection

Bluetooth is a modern system that allows you to wirelessly connect different devices, such as a wireless hands-free phone, a phone and a computer, or two phones with each other.

It is possible to transfer call sound or send files or receive files from another device.

Select in menu:
Settings → Connection →Bluetooth

There are available items such as Wiring, Visibility, My Device, Device Search, Device Name, Advanced.

SIM toolkit services

Choose **Organizer → SIM Toolkit** for mobile banking, timetables and other SIM services for your operator.

Photo camera

The camera lens is located on the front of the phone. Press the shutter button **(15)** to turn on and the camera turns on after a while.

When you activate the camera you can shoot images by pressing the shutter button **(15)**.

Press the left "Options" button **(2)** to display the camera menu.

Settings

To set other properties, select **Settings** in the main menu of your phone. You now have several setup options.

Mobile phone settings

Select in menu: **Settings** ➔ **Phone**
Allows you to set basic phone parameters:

1. **Time and date** – enables to set time, date and time zone
2. **Language** – to set the language of the phone menu
3. **Text input –** default text input setting
4. **View –** allows you to set the initial animation, wallpaper, display on main screen etc.
5. **LED mode–** enables or disables to switch on/off the signal LED indicators on the external cover of the phone
6. **LCD backlight** – brightness and time of the display backlight
