Mobile phone controls

1. Earphone	3. Left functional button
2. Screen	4. Button for „Calls"

5. Charger connector
6. Numeric keypad
7. Navigational button
8. Right functional button / contacts
9. Lantern
10. Button to Finish call / Switch On
11. Button OK
12. Earphone connector

Insert SIM, memory Cards and batterie

1. Remove the battery cover on the back of the phone
2. Carefully insert one or two SIM cards into the holders under the battery compartment. Make sure that the SIM cards are positioned correctly with the contacts facing down. The battery must be removed when inserting SIM cards
3. Insert the microSD card into the holder
4. Insert the battery
5. Replace the cover

Battery charging

At the top of the screen there is a battery charge indicator. If the battery is low, follow these steps:

1. Connect the charger to a wall outlet.
2. Connect the charger to the phone
3. After charging the battery, disconnect the charger from the phone and then from the wall outlet.

You can charge the phone when it is in switched on or switched off mode.

If the battery is completely discharged, such as after a long period of inactivity, it may take up to several tens of minutes before the charging indicator appears and before the phone can be turned on and ready to use.

Switch On / Off

To turn on or off, press and hold the end call key (10).

Briefly press this button to end a call or an application or to return to the main screen.

If the phone lock is activated, enter the password.
The default phone password setting is 1234.

Making calls

Enter the phone number using the telephone keypad and press the call key **(4)**. If two SIM cards are inserted, you will be prompted to select the SIM card to use for the call.

To end or to reject the call, press the end call key (10).

Keypad lock

To set the automatic keylock properties, select:
Settings> Display> Auto key lock

You can manually lock the keypad by pressing the left button (3) and then pressing the * button.

To unlock the keypad, first press the left button (3) again and then the * button.

The emergency number 112 can also be called when the keypad is locked.

Volume

You can adjust the volume during a call by pressing the navigation button (7).

To activate handsfree / speakerphone, press the right function key (8) during a call.

Warning: Exposure to excessive noise can damage your hearing! Listen to music at a moderate level and do not hold the device near your ear, especially when using the loudspeaker!

Antenna location

The device has internal antennas for reception and transmission at the rear bottom part of the phone.

Do not cover the places where the antennas are located. When talking, hold the device at least 2-3 cm away from your body. This will reduce the amount of electromagnetic radiation absorbed by your body. Covering the antennas also affects the intensity of the transmission and hence the battery life.

Text input

The phone keypad allows you to enter numbers and characters. When entering characters, several letters are assigned to each button. For example, for button 2, the letters are A, B, C. To insert a space, press the 0 button. E.g. the letter A is the first one in the sequence, so press button 2

once. The letter C is the third in the sequence, so we press the button three times in quick succession.

Use the # key to toggle between writing, uppercase, lowercase, and numbers when writing text.
Special characters can be entered using the * key.

- Use the # key to toggle between writing, uppercase, lowercase, and numbers when writing text.
- Special characters can be entered using the * key.

Phonebook

Phone numbers of contacts can be stored both in the phone memory and in the SIM card memory.

Dial numbers from contact list

The easiest way to display the list is to press the right function key "Contacts" (8). You can now enter the name you are looking for. Then the list of matching contacts starts immediately.

Use the up and down keys to select the contact you want to call and press the call key (4).

When viewing the list, a phone icon 📱 appears for each contact if the contact is stored in the phone memory. If it is stored on the SIM card, the card icon 🪪 appears.

Messages

To work with messages, select **Messages** in the phone menu and the desired option.

To write a short text or MMS message, select Write. Use the **OK button (11)** to select a recipient from the phone book or enter the number manually, enter the message text and press the OK button (11). Then follow the on-screen instructions.

Lantern

To switch the lantern (9) on the top of the phone on / off, press and hold the "0" button.

Shortcuts

Favorite functions can be assigned to one of the four direction pages of the navigation key (7). When you press one of the directions, the function starts.

To change the settings, in menu go to :
Settings→ Phone→ Shortcuts setting
